

STIFTUNG NATURSCHUTZ

is the largest public foundation with the focus on Nature Conservation in Northern Germany.

For 30 years now it has been our aim to preserve and enhance nature in the region of Schleswig-Holstein. We own and manage about 250 km² of land spread over the region. It covers a wide range of habitats from mire to grassland, from water bodies to forest.

We mainly manage pastoral landscapes on large scales. Our own "Task Force" of about 1.000 hardy cattle and horses are doing their "work" on part about of our 250 km² property by whole year grazing, creating a mosaic of different habitats and structures.

Other sections are leased out to local farmers and their cattle or set aside as fallow ground for successional processes.

WITHIN 30 YEARS

of nature conservation work we have built up experience, capacities and abilities in:

- long term habitat management,*
- management of our own herds of hardy grazers,*
- application writing and implementing of EU-funded projects (Interreg, LIFE) as beneficiary and partner,*
- conducting projects funded by national (BfN) and private funds,*
- cooperation with a wide range of different partners in Germany & Europe, e. g. for Natura 2000 subjects,*
- professional Public Relation and Awareness Rising activities.*

CONTINUING THIS

process of extending our range of activities we are looking for new partnerships.

It doesn't matter if you are big or small, a public or private organisation, an administration, foundation or association.

We want to widen our range of activities, share and extend our experience and knowledge transfer.

We are an open minded organisation and always looking for new ideas, cooperations and projects.

You...

You want to tackle problems on site within a partnership?

You have challenges and are looking for experience exchange?

You have a new project in mind?

You are looking for a new cooperation or a new partner?

You have a good project idea but want to avoid the burden of a project beneficiary?

For example concerning:

- Species protection*
- Managing pastoral landscapes*
- Meadow bird management*
- Awareness rising activities*

or nature conservation in general ?

Please contact us for experience exchange and a good cooperation for the benefit of Nature.
