### **DE-24 : Sundwiesen**

SPA: - ; pSCI : 1532-321

Protection status: nature reserve, NSG Sundwiesen

Habitats:

-

Animals:

-

Plants:

Apium repens

Site description:

This site is the only place *Apium repens* is naturally growing in Schleswig-Holstein. It contains of several small sections around a small village. The complex is rather a overgrown grey dune heavily "misused" and abandoned for long time. The section with *Apium repens* has been extensively grazed by cattle or horses since long time.

Foreseen actions:

Continuing appropriate grazing scheme.

Proceedings: Further actions/continuation:

Nothing foreseen on site

Any further activities would be coordinated with the district administration.
